

# ISO/IEC JTC 1/SC 27/WG 3 N 1762

REPLACES: N

## ISO/IEC JTC 1/SC 27/WG 3

Information technology – Security techniques – Security evaluation, testing and specification

Convenorship: AENOR, Spain, Vice-convenorship: JISC, Japan

**DOC. TYPE:** outgoing liaison statement

**TITLE:** Liaison statement to the CCUF

**SOURCE:** 59th SC 27/WG 3 meeting

**DATE:** 2019-10-18

**PROJECT:** All projects

### STATUS:

As per WG 3 recommendation 18 (contained in SC 27 N20053 / WG3 1742) of the 58th SC 27/WG 3 meeting in Paris, France, October 14th – 18th 2019, this document has been sent to the CCUF. It is circulated within SC 27/WG 3 for information.

**ACTION:** FYI

**DUE DATE:**

**DISTRIBUTION:** M. Bañón, N. Kai, WG 3 Experts

**MEDIUM:** <http://isotc.iso.org/livelink/livelink/open/jtc1sc27wg3>

**NO. OF PAGES:** 1 + 2

## LIAISON STATEMENT

FROM: ISO/IEC JTC 1/SC 27/WG 3  
TO: The CCUF

ISO/IEC JTC 1/SC 27/WG 3 thank the CCUF for their liaison statement circulated as ISO/IEC JTC 1/SC 27/WG 3 N1761 dated October 13, 2019.

WG 3 thanks the CCUF for the updates of the dates and locations of its forthcoming meetings. These are noted and WG 3 requests that the CCUF continue to include information about their future meetings in their future liaison statements.

WG 3 had a busy and productive set of meetings, including consideration of over 634 comments on the second committee drafts of ISO/IEC 15408, 18045, and the associated TR22216. The comment disposition spreadsheets are attached for information.

During the review of ISO/IEC 15408-2 CD2 and TR22216 WD3, comments have been received on the FPT\_INI SFRs and Terminologies received via other WG3 liaisons. The editors of ISO/IEC 15408-2 note that this SFR may be of interest to some of the technical communities associated with the CCUF and suggests their review. Since ISO/IEC 15408-2 is progressing to DIS no major technical comments can be considered at this point.

The WG 3 continues the Study Period on "*Evaluation criteria for connected vehicle based on ISO/IEC 15408*" for another 6 months. WG3 welcomes input to this Study Period from the CCUF. Any input from the CCUF should be received by the rapporteurs by the date given in our resolutions document. (SC 27 N20053 / WG 3 1742).

In addition, the next drafts of ISO/IEC 23532-1, ISO/IEC 23532-2, will be circulated by the date given in our resolutions document. (SC 27 N20053 / WG 3 1742). It concerns the requirements for the competence of IT security testing and evaluation laboratories. CCUF stakeholders with experience in the requirements for IT security testing and evaluation laboratories should consider commenting and providing input.

The future milestones in respect of the development of ISO/IEC 15408, 18045, and associated TR22216 are:

| Stage | Date    |
|-------|---------|
| DIS   | 2020-04 |
| PUB   | 2021-04 |

WG 3 encourages the CCUF to contribute to WG 3 work through the liaison channel. CCUF comments and contributions to any current WG 3 work items (listed in the attached resolutions) are welcomed.

We look forward to continuing the rewarding relationship with the CCUF and encourage the CCUF to provide any CCUF work items that the working group may consider for review or comment as attachments to the next liaison statement.

Please note that the latest status of all of the WG 3 projects that were worked on in Paris, the relevant document numbers, and the schedule for updates and comments are all to be found in the WG 3 resolutions document, (SC 27 N20053 / WG3 1742) that is attached to this liaison statement. Documents of interest to the CCUF are made available through the liaison channel with SC 27.

**Working Group 3 Future meetings**

SC 27 plans its next Working Group meetings in Saint Petersburg, Russia. Please refer to the WG3 resolutions document for the exact dates, and information about subsequent meetings.
