NO. OF PAGES: 1 + 2

LIAISON STATEMENT

FROM: ISO/IEC JTC 1/SC 27/WG 3
TO: The CCUF

Appreciation

ISO/IEC JTC 1/SC 27/WG 3 thank the CCUF for their liaison statement circulated as ISO/IEC JTC 1/SC 27/WG 3 N1837 dated April 20, 2020.

WG 3 thanks the CCUF for the updates of the dates and locations of its forthcoming meetings. These are noted and WG 3 requests that the CCUF continue to include information about their future meetings in their future liaison statements.

SC 27 Projects which may be of interest to the CCUF

Overall, WG 3 had a busy and productive set of meetings. The disposition of comments agreed in Paris was implemented by the ISO/IEC 15408 and ISO/IEC 18045 editors. The draft DIS document were produced by WG 3 on time for 15th March 2020 and have been distributed for INFO (N20033, N20034, N20035, N20036, and N20037). Since ISO/IEC 15408, ISO/IEC 18045 are undergoing DIS ballot at present, there were no editing activities for these. Note that no major technical comments can be considered during the DIS ballot of ISO/IEC 15408, ISO/IEC 18045.

The future milestones in respect of the development of ISO/IEC 15408 and ISO/IEC 18045 are:

Stage	Date
DIS	2020-03
PUB	2021-03

The WG 3 continues the Study Period on "Evaluation criteria for connected vehicle based on ISO/IEC 15408", "Introduction of new assurance requirements in ISO/IEC 15408-3 covering patch management and deployment activities", "Multi-Party Coordinated Vulnerability Disclosure and Handling", "Update of ISO/IEC 19790:2012 and ISO/IEC 24759:2017", "Framework for cybersecurity assurance and relation with ISO/IEC 15408" for another 6 months. WG3 welcomes input to this Study Period from the CCUF. Any input from the CCUF should be received by the rapporteurs by the date given in our resolutions document. (SC 27 N20578 / WG3 1823).

In addition, the next drafts of ISO/IEC 23532-1, ISO/IEC 23532-2, will be circulated by the date given in our resolutions document. It concerns the requirements for the competence of IT security testing and evaluation laboratories. CCUF stakeholders with experience in the requirements for IT security testing and evaluation laboratories should consider commenting and providing input. WG 3 encourages the CCUF to contribute to WG 3 work through the liaison channel. CCUF comments and contributions to any current WG 3 work items are welcomed.

We look forward to continuing the rewarding relationship with the CCUF and encourage the CCUF to provide any CCUF work items that the working group may consider for review or comment as attachments to the next liaison statement.

Please note that the latest status of all WG 3 projects, the relevant document numbers, and the schedule for updates and comments are all to be found in the WG 3 resolutions document, (SC 27 N20578 / WG3 1837) that is attached to this liaison statement. Documents of interest to the CCUF are made available through the liaison channel with SC 27/WG 3.

Working Group 3 Future meetings

SC 27 plans its next Working Group meetings in Warsaw, Poland. Please refer to the WG3 resolutions document for the exact dates, and information about subsequent meetings.
